

**Pharos - RDM DMX Splitter (A64791)**

**RDM DMX splitters  
A64791**

**Product description**

**Technical information**

The Pharos RDM (Remote Device Management) is a 4 port DMX512 Splitter compatible with the RDM standard to provide DMX output to luminaires and other devices. DMX splitters are an essential requirement for most control systems, allowing multiple separate cable runs from a single DMX output and ensuring electrical isolation.
